ASOC GRADE- RESTRICTED / GENERAL - **PART I**

Max marks - 100 (50)

Warning : Donot write anything on question paper.

Write your choice on answer sheet provided.

SAMPLE PRACTICE PAPER – Aug 2013

SECTION –A (Radio theory & Practice)

1. Referring to Ohm's Law Current flowing in a conductor is	(a) Inversely proportional to voltage	(b) Directly proportional to voltage	(c) Infinite	(d) Directly proportional to resistance
2. The Unit of capacitance is	(a) Henry	(b) Ohm	(c) Farad	(d) Jules
3. If the inductors L1, L2 & L3 are in parallel, the resultant inductance would be :	(a) $1/L1+L2+L3$	(b) $L1/L2+L2/L3$	(c) $1/L1+1/L2+1/L3$	(d) $L1+L2+L3$
4. Which one is a Passive device?	(a) Modulator	(b) Transistor	(c) Resistor	(d) Diode
5. On What principal Transformers are based?	(a) Mutual Induction	(b) Ionization	(c) Self Induction	(d) Resonance
6. The semiconductor materials are basically :	(a) Three types	(b) Ten types	(c) Two types	(d) Four types
7. If RMS reading AC Voltmeter reads 65 V on a sinusoidal waveform, the peak-to-peak voltage will be	(a) 84	(b) 48	(c) 182	(d) 128
8. Referring to Kirchoff's Law Current flowing through a closed circuit is equal to :	(a) Infinite	(b) Zero	(c) Sum of all the currents	(d) Subtraction of Input and Out put
9. When the electron is completely removed from the atom, the atom is said to be :	(a) Neutral	(b) Excited	(c) Ionized	(d) destroyed
10. Radio waves received at the Radio after reflection from the ionosphere are called as :	(a) Ground wave	(b) surface wave	(c) space wave	(d) Sky wave
11. N type semiconductor has :	(a) More holes than electrons	(b) More electrons than holes	(c) No electrons at all	(d) No holes at all
12. The emitter follower is an amplifier having common :	(a) Emitter	(b) Base	(c) None	(d) collector
13. In class A amplifier amplification takes place for :	(a) < half cycle	(b) > half cycle	(c) Half cycle	(d) Full cycle
14. The common amplifier used to obtain :	(a) Decrease voltage, current & Power	(b) Increase voltage, current & power	(c) decrease frequency	(d) Increase frequency
15. In R C phase shift oscillation the frequency of oscillation is :	(a) $f = \frac{1}{2\pi} \sqrt{RC}$	(b) $f = \frac{1}{2} \pi RC$	(c) $f = 1/RC$	(d) $f = Rc/2 \pi$
16. Modulation is the process to vary	(a) Higher carrier frequency by the signal to be transmitted	(b) Power of the signal	(c) RX Frequency	(d) TX frequency
17. What is the modulation index in FM ?	(a) 75/deviation in kHz	(b) 75 x frequency	(c) 7500/deviation in MHz	(d) 100/frequency
18. What is the meaning of IF in a radio receiver?	(a) Internal frequency	(b) modulating frequency	(c) Intermediate frequency	(d) ionization frequency
19. If the receiver produces an accurate reproduction of the modulating signal , then it has a good	(a) fidelity	(b) sensitivity	(c) Selectivity	(d) productivity
20. The wave length of 144 Mhz is	(a) 3 mtr	(b) 144 mtr	(c) 1 mtr	(d) 2 mtr
21. What is the resonant frequency of series RLC circuit if R is 22 ohms, L is 50 microhenrys and C is 40 picofarads	(a) 44.72 MHz	(b) 22.36 MHz	(c) 3.56 MHz	(d) 1.78 MHz
22. What do you understand by IF in a Radio receiver ?	(a) Internal frequency	(b) ionization frequency	(c) modulating frequency	(d) Intermediate frequency
23. The image frequency in Fm is related to signal frequency Fs & intermediate frequency Fi as :	(a) $Fm = Fs + Fi$	(b) $Fm = Fs + 2Fi$	(c) Fs/Fi	(d) $Fm = 2Fs + Fi$
24. When the sky wave is received at receiver the resultant signal intensity varies randomly. It is called :	(a) Ionization	(b) polarization	(c) fading	(d) distortion
25. The line of sight propagation is mainly associated with :	(a) VHF/UHF	(b) VHF	(c) HF	(d) MF
